*Fortissimo*

Pure **EXPRESSION**

### *Hauptwerk*

Have you always wanted to play the Father Willis-organ of the Salisbury Cathedral? Or the Marcussen-organ of the Grote of Sint-Laurenskerk in Rotterdam? Mixtuur and Hauptwerk™ can make the impossible a reality, enabling you to play the organs of your dreams, in high fidelity, right in your own living room or studio!

### *How does it work?*

Hauptwerk™ is a powerful software program based on MIDI that enables you to load sample sets from organs that have been meticulously sampled. The sound of each individual pipe of the sampled organ has been individually recorded — including the attack transient of the pipe, the development of the note, and the release. The result is a vibrant sound. This also means a staccato note will sound different from the same note played legato. Hauptwerk™ produces a highly realistic sound rendering, ensuring that you will truly experience the organ.

### *Virtually limitless possibilities*

Whereas the original organs have their natural limits, Hauptwerk™ transcends them. You can easily change the organ's temperament or pitch without having to adjust each pipe individually. Furthermore, you can have multiple sample sets on a single organ, from Baroque to Romantic. There are currently sample sets from hundreds of organs available. You can just as easily play Bach on a Silbermann as you can Franck on a Cavaillé-Coll; Hauptwerk™ makes it all possible. In short: play and experience music the way it was intended!

### *The result*

Playing a Mixtuur organ is always a delight. And you needn't keep it to yourself, because with Hauptwerk™ you can easily make your own recordings in CD quality, or as MIDI files, to share your music with family and friends. A Mixtuur organ gives you the ultimate opportunity to experience your music at home!

Mixtuur”

### *Mixtuur Fortissimo*

With its traditional appearance and majestic sound, the Fortissimo is a great fit for any living room or studio. The Fortissimo is available in versions with either three or four manuals and produced in natural oak as standard, with other colours and woods available. The organ has six premium speakers, each with its own power amplifier. Combined with the advanced Digital Signal Processor (DSP) designed in-house by Mixtuur Orgels, the result is the best possible sound.

### *Easy operation*

With the lit-up rocker tabs, you'll feel at home right away. Together with the touchscreen above the manuals, they give you optimal control of your Hauptwerk™ organ. Each sample set's stops are shown across the rocker tabs in a straightforward layout. The magnetic stop labels above the rocker tabs are easily replaced when you choose a new sample set. All of the organ's features are easily accessible through the touchscreen menu; with options, for example, to adjust the temperament or reverb (virtual listening position), or to make your own recordings (in MIDI or audio). No computer expertise required!

### *Sophisticated technology*

The Fortissimo's rocker tabs and touchscreen controls were developed in-house by Mixtuur Orgels and provide optimal control over your organ. Both work seamlessly with the Hauptwerk™ software, providing a wider range of features than you see with other suppliers' offerings. With its spacious organ case, the Fortissimo's audio sounds ideal. The intelligent positioning of the speakers within the organ case combined with our own audio technology means that you can count on a perfect result.

### *Ultimate experience*

With the Fortissimo, Mixtuur offers you the ultimate music experience in your living room. Thanks to the many available options, the organ can be fully tailored according to your needs. Make a no-obligation appointment to come play, listen to and experience the organ for yourself. We'd love to show you the possibilities.

# The authentic sound of famous organs performed by your Mixtuur organ

## *Mixtuur Orgels*

Mixtuur Orgels has been at the forefront of Hauptwerk™, audio technology and MIDI consoles for many years now. Mixtuur Orgels was there since the very introduction of Hauptwerk™ in the Netherlands. With a production hall in Veenendaal and a showroom in de Stad Klundert, the former Church of Saint John the Baptist, Mixtuur Orgels has been an official Hauptwerk™ dealer for the Benelux since 2007.

## *Why Mixtuur?*

Mixtuur builds organs for individuals, churches and concert halls. Models vary from standardised organs to tailored instruments. All Mixtuur organs are developed, constructed and tested fully in-house, using proprietary technologies developed by Mixtuur to harmonise seamlessly with the Hauptwerk™ software. Besides the organs themselves, we manufacture all audio components such as amplifiers and speakers in-house, guaranteeing the optimal sound experience for your dream organ!

## *Mixtuur quality*

By constructing our own instruments and audio components, we are able to guarantee the highest possible quality for every customer. At an affordable price, too: comparable audio systems from other manufacturers tend to be far more expensive. This also means we can provide you with superior service; we can be certain that we'll always be able to help you – now and in the future – since we're not dependent on other suppliers.

## *Customer satisfaction*

Mixtuur Orgels believes strongly that customers should be able to enjoy their organs with complete satisfaction and no worries. That's why Mixtuur Orgels guarantees the quality of its instruments and audio, providing a 5-year warranty.
