

Mixtuur

Positief

Hauptwerk

Have you always wanted to play the Marcussen-organ of the Grote of Sint-Laurenskerk in Rotterdam? Or the van Dam-organ of the Grote kerk in Tholen? Mixtuur and Hauptwerk™ can make the impossible a reality, enabling you to play the organs of your dreams, in high fidelity, right in your own living room or studio!

How does it work?

Hauptwerk™ is a powerful software program based on MIDI that enables you to load sample sets from organs that have been meticulously sampled. The sound of each individual pipe of the sampled organ has been individually recorded — including the attack transient of the pipe, the development of the note, and the release. The result is a vibrant sound. This also means a staccato note will sound different from the same note played legato. Hauptwerk™ produces a highly realistic sound rendering, ensuring that you will truly experience the organ.

Virtually limitless possibilities

Whereas the original organs have their natural limits, Hauptwerk™ transcends them. You can easily change the organ's temperament or pitch without having to adjust each pipe individually. Furthermore, you can have multiple sample sets on a single organ, from Baroque to Romantic. There are currently sample sets from hundreds of organs available. You can just as easily play Bach on a Silbermann as you can Franck on a Cavaillé-Coll; Hauptwerk™ makes it all possible. In short: play and experience music the way it was intended!

The result

Playing a Mixtuur organ is always a delight. And you needn't keep it to yourself, because with Hauptwerk™ you can easily make your own recordings in CD quality, or as MIDI files, to share your music with family and friends. A Mixtuur organ gives you the ultimate opportunity to experience your music at home!

Superior TECHNOLOGY

Mixtuur QUALITY

“
The

sound of
Mixtuur ”

Mixtuur Positief

The Positief is a stately organ of robust dimensions, with a majestic sound for any living room or studio. The drawstops make the experience complete. The Positief is available in versions with either two or three manuals and produced in natural oak as standard, with other colours and woods available. The organ has six premium speakers, each with its own power amplifier. Combined with the advanced Digital Signal Processor (DSP) designed in-house by Mixtuur Orgels, the result is the best possible sound.

Easy operation

You can assign the drawstops to your favourite sample set. Together with the touchscreens above the manuals, they give you optimal control of your Hauptwerk™ organ. Sample sets that haven't been assigned to the drawstops can be operated through a straightforward layout visible on the touchscreens. The touchscreen menu also provides access to all of the organ's features; with options, for example, to adjust the temperament or reverb (virtual listening position), or to make your own recordings (in MIDI or audio). No computer expertise required!

Sophisticated technology

The Positief's drawstops and touchscreen controls were developed in-house by Mixtuur Orgels and provide optimal control over your organ. Both work seamlessly with the Hauptwerk™ software, providing a wider range of features than you see with other suppliers' offerings. In this robust organ case, the Positief's audio sounds ideal. The intelligent positioning of the speakers within the organ case combined with our own audio technology means that you can count on a perfect result.

Ultimate experience

With the Positief, Mixtuur offers you the ultimate music experience in your living room. Thanks to the many available options, the organ can be fully tailored according to your needs. Make a no-obligation appointment to come play, listen to and experience the organ for yourself. We'd love to show you the possibilities.

The authentic sound of famous organs performed by your Mixtuur organ

Mixtuur Orgels

Mixtuur Orgels has been at the forefront of Hauptwerk™, audio technology and MIDI consoles for many years now. Mixtuur Orgels was there since the very introduction of Hauptwerk™ in the Netherlands. With a production hall in Veenendaal and a showroom in de Stad Klundert, the former Church of Saint John the Baptist, Mixtuur Orgels has been an official Hauptwerk™ dealer for the Benelux since 2007.

Why Mixtuur?

Mixtuur builds organs for individuals, churches and concert halls. Models vary from standardised organs to tailored instruments. All Mixtuur organs are developed, constructed and tested fully in-house, using proprietary technologies developed by Mixtuur to harmonise seamlessly with the Hauptwerk™ software. Besides the organs themselves, we manufacture all audio components such as amplifiers and speakers in-house, guaranteeing the optimal sound experience for your dream organ!

Mixtuur quality

By constructing our own instruments and audio components, we are able to guarantee the highest possible quality for every customer. At an affordable price, too: comparable audio systems from other manufacturers tend to be far more expensive. This also means we can provide you with superior service; we can be certain that we'll always be able to help you – now and in the future – since we're not dependent on other suppliers.

Customer satisfaction

Mixtuur Orgels believes strongly that customers should be able to enjoy their organs with complete satisfaction and no worries. That's why Mixtuur Orgels guarantees the quality of its instruments and audio, providing a 5-year warranty.

Passionate **PRECISION**

Optional FEATURES
